- ▶ Theme parks design and construction (theming elements and family leisure centers).
- ▶ Landscaping integration in specialized projects.
- ▶ Playground and children recreation development.
- ▶ Waste bins and waste recycling products.
- ▶ Underground waste system.
- ▶ Outdoor light design and installation for streets, urban areas, markets, beaches and public parks.
- ▶ Public area development for tourism attraction and family entertainment from conceptual design to construction.
- ▶ City breaths spots developments especially in the capitals and crowded cities with integration of waterfalls and water fountains.
- ▶ Jogging tracks, safety rubber floors, multifunction fields and walking paths development.

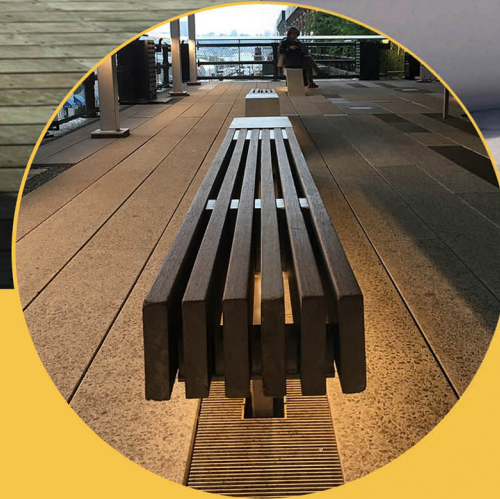

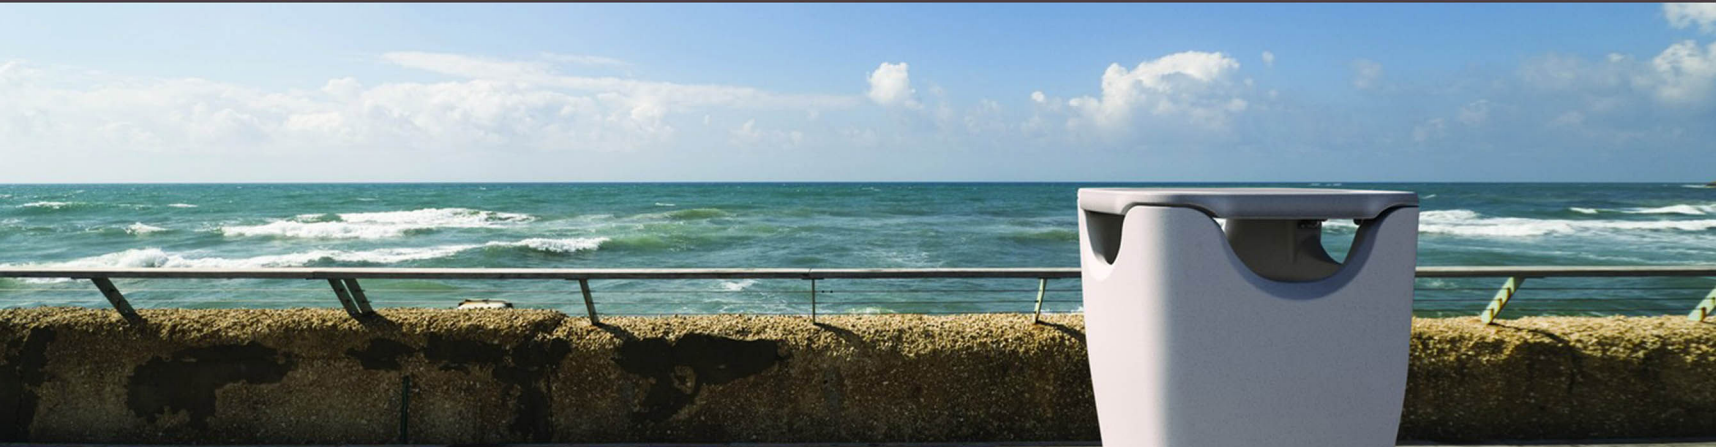

PLAYGROUND:

Metal parts are made of hot dip-galvanised, and coated with several layers: powder coating, PVC coating and Fiberglass Reinforced Polymer. Plastic parts are made of PE 500 approved by TÜV Wien EN 1176 1-7. Almost no maintenance because of high quality materials used in production.

CITY FURNITURE:

The top quality of signature public icons of planters, pergolas, marble, wood and metal combined benches. Wood-Plastic Composite (WOC) is durable and maintenance-free among our products. We customize design and fabricate it locally and import some parts from Spain, Italy and Turkey.

OUTDOOR LIGHTING:

- Unique designs
- High conductivity die casting aluminum equipped with IP67 cable gland
- Optic class Polycarbonate
- IP65/66 protection
- Integrated canopy compartment to prevent dust and sand entry.
- Free of hazardous components, ROHS compliance.
- Adjustable mounting

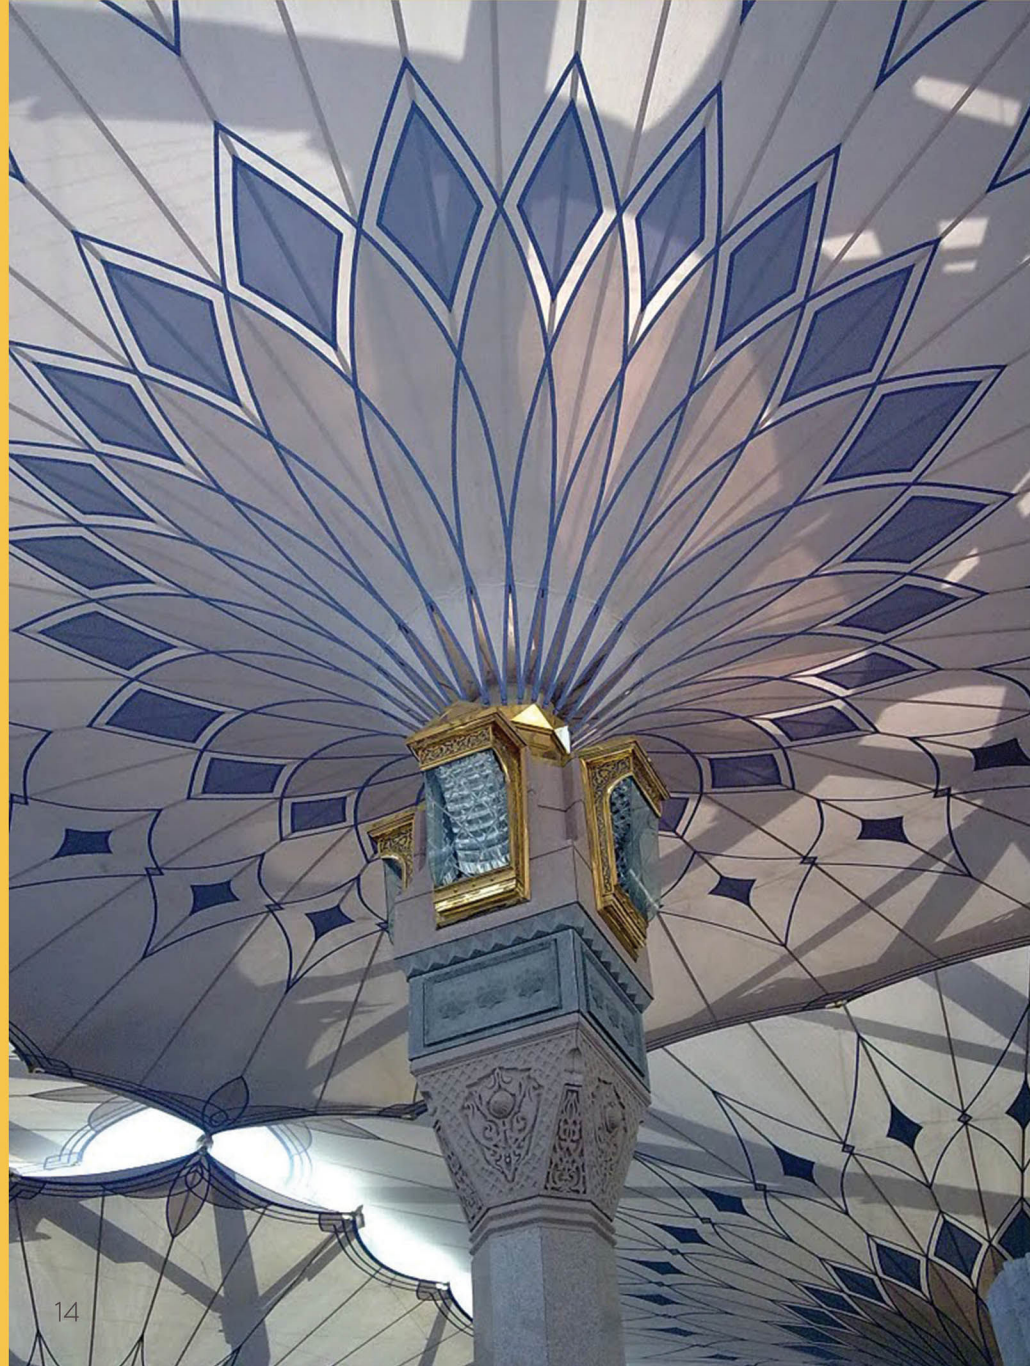

FITNESS EQUIPMENT:

Our high quality fitness equipments with employment of special materials; can be installed on beaches and in other harsh environments or, of course, in any other location. It is made entirely of AISI 316 stainless steel and highdensity polyethylene: anti-graffiti and maintenance-free.

Our products are licensed rehabilitation physician and a licensed physiotherapist and is certified by TÜV SÜD according to German standards on training apparatus in unsupervised public environments DIN79000.

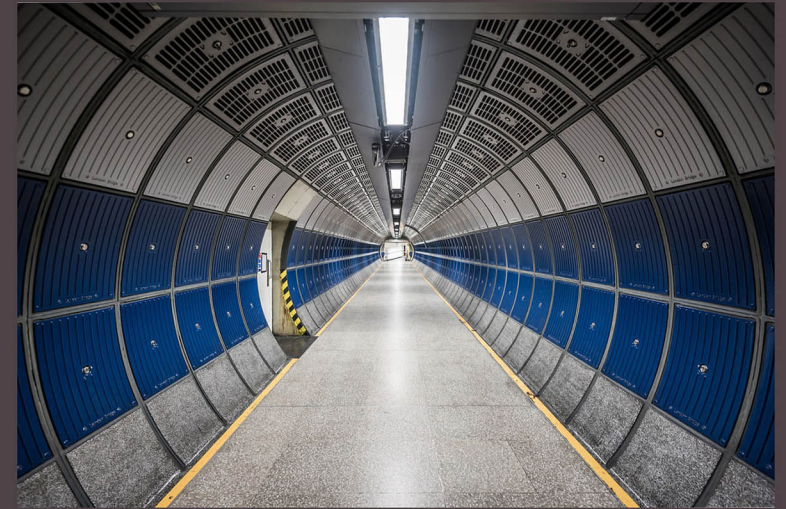

TESILE SHADE:

The fabric we use in our tensile shade is fire-resistant, high quality to resist heat and provide decent shelter. We customize design to match the surrounding architect thanks to the post and canopy combination. The fabric comes in several colors per customer need. The steel is dip-galvanized to resist corrosion. We design tensile shade to match Omani architecture.

WASTE MANAGEMENT:

Integration of sensing system in the bins helps waste collection companies to reduce their operation cost, efficient collection, time management and less transportation so less CO2 emission. AsfahanCo. promotes it's smart waste system solution through embedding sensors in all types of our waste bins. The sensors send notification to the operator to indicate waste level in the bins for smart collection and green cities.

CREATIVE FLOORS:

We design and manufacture creative floors, it's not floors to walk on but ideas to learn, enjoy while jogging, walking or hiking.
